

GANPAT UNIVERSITY

FACULTY OF U.V. PATEL COLLEGE OF ENGINEERING

Programme	Degree Engineering			Branch/Spec.	Automobile Engineering				
Semester	IV			Version	1.0.0.0				
Effective from Academic Year		2018-19		Effective for the batch Admitted in			June 2017		
Subject code	2CI311		Subject Name		Strength of Material				
Teaching scheme					Examination scheme (Marks)				
(Per week)	Lecture(DT)		Practical(Lab.)		Total	CE	SEE	Total	
	L	TU	P	TW					
Credit	3	0	1	0	4	Theory	40	60	100
Hours	3	0	2	0	5	Practical	30	20	50

Pre-requisites:

None

Learning Outcome:

Learning Outcomes:

After completion of this course, student will be able to

- Calculate and draw bending moments and shear forces diagrams in beam.
- Differentiate bending stress, shear stress and principle stress.
- Understand the design consideration of column and strut.
- Determine the deflection and slop for various beam.
- Design the shaft, key and coupling based on torsion theory.

Theory syllabus

Unit	Content	Hrs
1	<p>Stresses and Strains: Elastic, Homogeneous, Isotropic materials, Limit of elasticity and proportionality, Yield limit, Ultimate strength, Strain hardening, Section of composite materials, Prismatic and non-prismatic sections. Strains: Linear, Shear, Lateral, Thermal and volumetric, Poisson's ratio. Stresses: Normal stresses axial- tensile and compressive, Shear and complementary shear, Thermal and hoop. Applications to composite material stepped and tapered bars.</p>	7
2	<p>Bending Moment and Shear Forces in Beams: Bending moment and shear forces, Bending moment and shear force diagrams for statically determinate beams subjected to couples, Connected forces, uniformly distributed loading, Relation between bending moment, Shear force and rate of loading, Point of contra flexure.</p>	6
3	<p>Bending Stresses in Beams: Introduction, Simple bending, Theory of simple bending, Moment of resistance, Modulus of section, Beam of uniform section, Composite section.</p>	5
4	<p>Shearing Stresses in Beams: Introduction, Shear stress distribution for beam of rectangular, Circular, Triangle and I- section.</p>	3
5	<p>Principal Stresses and Strains: Principal planes, Principle stresses, Analytical method for principal stress, Mohr's circle of stress and strain, Theories of failure.</p>	5
6	<p>Deflection of Beams: Strain curvature and moment, Curvature relations, Differential equations for deflection of elastics beams, Different methods for determining slope and deflections</p>	5
7	<p>Columns and Struts: Short column subjected axial forces and bending moments, Engineering problems, Long columns, Stability and equilibrium, Ranking formula, Indian standard formula, Criteria for design of columns.</p>	3
8	<p>Structured Connections:</p>	3

	Riveted and welded connections, Methods of failure of connections, Eccentric riveted and welded connections, Design requirements.	
9	Torsion: Basic assumption, Torsion formula, Design of circular sections, Angle of twist, Shearing stress, Deformation, Closed coiled helical springs, Helical Springs, power transmitted by shaft, keys & coupling	4
10	Direct and Bending Stresses: Members subjected to eccentric loads, Middle third rule, and kernel of section, Stresses subjected to wind mill, Retaining walls and dams subjected to hydraulic pressure.	4
Practical content		
<p>Term work:</p> <ul style="list-style-type: none"> The term work shall be based on experimental and analytical work on the topics mentioned above and will be defended by the candidates. <p>Practical work:</p> <ul style="list-style-type: none"> The practical work shall be based on experimental and analytical work on the topics mentioned above and will be defended by the candidates. 		
Text Books		
1	S. Ramamrutham, "Strength of materials", Dhanpatrai & Sons, 14 th edition,	
2	R. S. Khurmi, "Strength of materials" S. Chand & Co. New Delhi. 13 th revised edition	
Reference Books		
1	S. B. Junnarkar and H.J. Shah, "Mechanics of structure vol I", Charotar publishing house, Anand, 13th edition.	
2	M. Chakraborti, S. K. "Strength of materials", Kataria & Sons, 2013.	
3	M.D. Raisinghania. "Ordinary and Partial Differential Equations" S. Chand Publishing, 2008	
4	TimoShenko, "Strength of materials", CBS Publisher, New Delhi, 5th edition
